

Marion Lenne

French Industrial designer - 26 yo

ABOUT ME

Currently working at Designit - Copenhagen, I have been working in the USA for the past year and half in design consultancy field. I am an empathic person that's why I focus my design around the user and the real potential for the market.

The diversity of design is so vast that I am always excited to work on a new project, find the best insights to create clever and unique designs and never afraid of challenge.

I am a collaborative person who likes to be a part of a team.

I am also passionate about graphic design and project management.

More about me : I enjoy exploring new cities to satisfy a natural curiosity for travel, and capturing local culture and architecture through unusual and unique photography. I also enjoy expressing myself through baking for my colleagues.
